Fully-Funded Doctoral Degree Scholarship from
University of Waikato and Manaaki Whenua - Landcare Research,
New Zealand

University of Waikato and Manaaki Whenua - Landcare Research are looking for a doctoral degree student to work as part of a fully-funded, collaborative programme studying **the floral traits of New Zealand rainforest tree species**. The student will quantify key floral traits for a suite of native rainforest trees and develop a set of research questions to explore variation among and within species in these traits.

The successful applicant will receive a full scholarship plus tuition fees, and be enrolled at the University of Waikato under the supervision of Associate Professor Mike Clearwater, with joint supervision by Dr Sarah Richardson at Manaaki Whenua, New Zealand's Crown Research Institute specialising in terrestrial ecology.

Enquiries and applications should be sent by email to Associate Professor Mike Clearwater (mike.clearwater@waikato.ac.nz) **before 20 April 2018**.

For further information regarding the project description and application, please visit the Floral Traits of New Zealand Rainforest Tree Species website:
