Additional information:

The Master of Science program in Science for Industry is a multidisciplinary graduate program focusing on joint research based on the university-industry co-creation platform. This program has joined the Higher Education for Industry Consortium (Hi-Fi) by which the graduate scholarships can be provided to high potential foreign students who show evidence of adequate ability for collaborative research with industry. Importantly, the students experience the problem-based learning at the industrial sector under the supervision of an advisor from university. In addition, the extracurricular activities are also added to the program in order to get the students ready for working in the industry.
